GLOBAL SUPPLIERS OF PARTS, COMPONENTS AND MACHINES

EHS treats every sale as a mutual exchange, focused on creating genuine value for both the customers and the business. Avoid downtime and lost revenue with our end-to-end support across the full lifecycle of your equipment, from diagnostics and dismantling to service exchange, workshop services, and freight. Every solution is tailored, efficient, and focused on keeping your operation moving.

EHS is a trusted national resource for new, used, and reconditioned parts and components across the mining, civil, and construction industries.

▶ **We source, dismantle, exchange, and supply everything from individual parts to complete machines.**

ABOUT

Backed by extensive industry knowledge and one of the largest inventories in the region, EHS helps minimise downtime and reduce costs, keeping projects on schedule and machines operating efficiently.

Beyond parts, EHS delivers end-to-end solutions, including diagnostics, repairs, rebuilds, and delivery. Every service is driven by a commitment to efficiency, integrity, and optimal outcomes.

Founder Chris began his career as a qualified diesel fitter, before launching a labour hire business that gave him exposure to a broad range of machinery, and an in-depth understanding of what heavy machinery owners really value. Over the last decade, EHS has expanded into dismantling to reduce overheads and offer more cost-effective solutions for customers.

EHS has earned a national reputation as leaders in their field for their expertise and vast inventory. Chris is regularly sought out by others in the industry for his unparalleled knowledge and problem-solving ability, and his reputation is upheld through each transaction.

SERVICES

PROBLEM SOLVING

- » Advanced diagnostics to identify the primary fault source
- » Expert advice on repair vs. replacement decisions
- » Tailored solutions for performance, reliability, and longevity

DISMANTLING

EHS specialises in purchasing and dismantling heavy earthmoving equipment.

Every machine goes through a detailed process, with all parts and components thoroughly cleaned, inspected, and preserved to our high standards. Only the best pieces are added to our extensive resale inventory.

- » All machines are sourced exclusively from mining companies and tier-one contractors to ensure component quality, traceability, and reliability meet industry standards.
- » Each component undergoes detailed inspection, preservation, and secure storage to ensure readiness for immediate sale and service.
- » Selected low-hour components are inspected, function-tested, and made available as affordable, service-ready replacements

SX: SERVICE EXCHANGE PROGRAM

EHS's SX Program provides a low-risk, cost-effective way to replace worn components with fully reconditioned, like-new units, without the delays of sourcing new.

We don't rebuild just anything, we hand-pick high-quality parts from our dismantle fleet based on their suitability for rebuild, ensuring only components with integrity to perform enter our exchange pool. Our team works closely with our customers to deliver fast turnaround, reliable supply, and lasting solutions you can trust.

- » Precision-reconditioned components using quality-assured processes
- » Rebuilt to meet or exceed OEM specifications
- » Backed by a new component warranty
- » Capped core charge for cost predictability
- » Sustainable
- » Quick turnaround
- » Cost-effective alternative

WORKSHOP SERVICES

Supplying parts is only one aspect of what we do — the real value is in honest advice, accurate diagnostics, and repairs you can trust.

Our workshop services include machine repairs, component change outs, rebuilds, and maintenance. We take the time to help customers identify the real issue through tailored diagnostic support, sometimes saving our customers from unnecessary part replacements.

When people purchase parts through EHS, we can install them or provide expert guidance to ensure correct and efficient fitting. From full machine overhauls to urgent breakdown repairs, we have the tools, expertise, and experience to deliver optimal results.

- » Component repairs and overhauls
- » Tailored maintenance programs
- » Scheduled component change-outs
- » On-site and off-site installation services
- » Technical inspections and fault diagnostics
- » Expert support and consultation

FREIGHT & LOGISTICS

Our full-service approach includes reliable freight through trusted carriers, so your parts arrive where and when you need them.

- » Trusted logistics partners
- » Delivery direct to your operation or site
- » On-time, trackable freight solutions

NEW // USED // RECONDITIONED

A WORLD OF KNOWLEDGE, PART NUMBERS, AND SOLUTIONS IN ONE LOCATION

We source and supply new and like-new reconditioned parts and components, restored to the highest industry standards, complete with certifications and warranties. Our facility stocks a wide range of high-demand components like cylinders, pumps, valves, torque converters, transmissions, final drives, wheel groups and more.
